Lapuan Patruunatehdas programme also includes 22 calibre slaughtering and plug pistol cartridges and 6,3 × 16. cal. plug pistol cartridges of various strengths.

The world championship cartridges

Lapuan Patruunatehdas has impressive traditions as a manufacturer of precision cartridges for competitions, practice and hunting. The first world championship was won in 1930. Since then, the honours in the following list offer distinguished proof of the success of this Finnish product. Lapua cartridges are products which have shown how well they can compete on world markets, too. Their top-quality materials, scrupulous manufacture and ultramodern technology form the basis on which their reputation in Finland and abroad has developed.
